

USE CASE TITLE

Trainer Session Attendance Dashboard Scenario

Training managers need a system to track daily student attendance across multiple batches

Key Features:

- Mark attendance (Present/Absent)
- View batch-wise attendance
- Date-wise filtering
- Attendance percentage calculation

PROBLEM STATEMENT

```
<!DOCTYPE html>
<html>
<head>
  <title>Trainer Attendance Dashboard</title>

  <style>
    body{
      font-family: Arial;
      background:#f2f2f2;
      padding:20px;
    }
  </style>
</head>
<body>
```

```
.container{
  width:500px;
  margin:auto;
  background:white;
  padding:20px;
  border-radius:10px;
}
```

```
table{
  width:100%;
  border-collapse:collapse;
  margin-top:20px;
}
```

```
table,th,td{
  border:1px solid black;
}
```

```
th,td{
    padding:10px;
    text-align:center;
}
```

```
    button{
        padding:8px 15px;
        margin-top:15px;
    }
</style>
</head>
```

```
<body>
```

```
<div class="container">
```

```
<h2>Trainer Session Attendance Dashboard</h2>
```

```
<label>Select Date:</label>
<input type="date" id="date"><br><br>
```

```
<label>Select Batch:</label>
<td>
<select id="batch">
    <option>Batch A</option>
    <option>Batch B</option>
    <option>Batch C</option>
</select>
</td>
<table>
<tr>
    <th>Student</th>
    <th>Attendance</th>
</tr>
```

```
<tr>
    <td>Rahul</td>
    <td>
        <select class="status">
            <option>Present</option>
            <option>Absent</option>
        </select>
    </td>
</tr>
```

```
<tr>
    <td>Priya</td>
    <td>
        <select class="status">
```

```
        <option>Present</option>
        <option>Absent</option>
    </select>
</td>
</tr>
```

```
<tr>
    <td>Anu</td>
    <td>
        <select class="status">
            <option>Present</option>
            <option>Absent</option>
        </select>
    </td>
</tr>
```

```
<tr>
    <td>Karthik</td>
    <td>
        <select class="status">
            <option>Present</option>
            <option>Absent</option>
        </select>
    </td>
</tr>
```

```
</table>
```

```
<button onclick="calculateAttendance()">
Calculate Attendance %
</button>
```

```
<h3 id="result"></h3>
```

```
</div>
```

```
<script>
```

```
function calculateAttendance(){
```

```
let students=document.getElementsByClassName("status");
```

```
let present=0;
```

```
for(let i=0;i<students.length;i++){
```

```
if(students[i].value=="Present"){
present++;
}
```

```
}
```

```

let percentage=(present/students.length)*100;

document.getElementById("result").innerHTML=
"Attendance Percentage : "+percentage.toFixed(2)+"%";

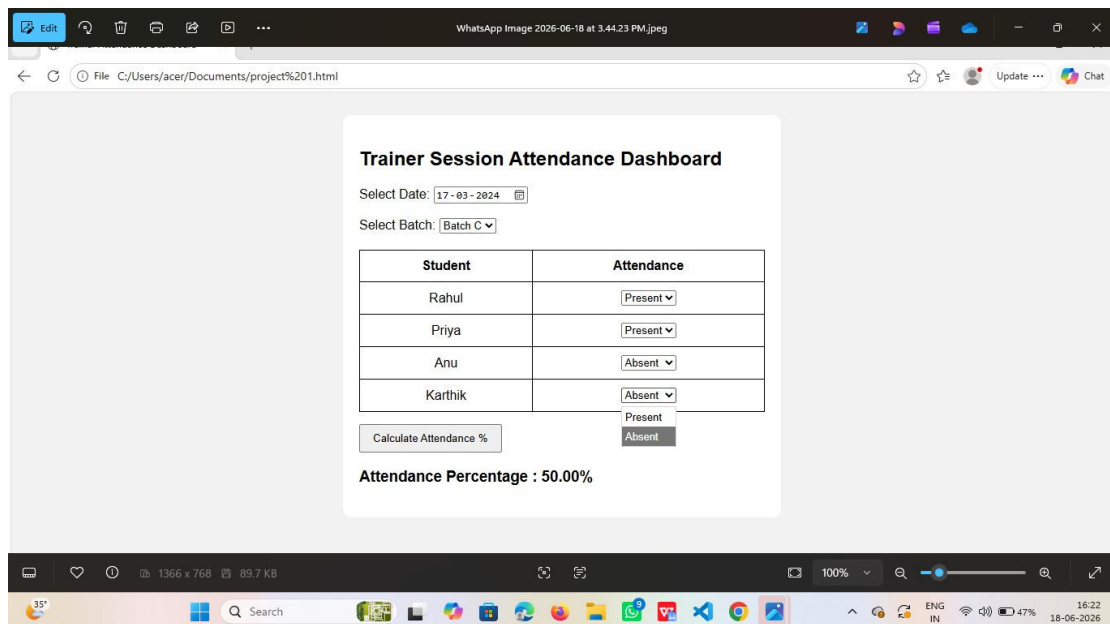

}

</script>

</body>
</html>

```

Output

PROJECT CONCLUSION

The **Trainer Session Attendance Dashboard** provides an efficient solution for managing student attendance across multiple batches. Trainers can mark attendance as Present or Absent, filter records by batch and date, and monitor attendance statistics through a dashboard. The automatic attendance percentage calculation helps training

managers analyze participation levels and maintain accurate attendance records in a simple and user-friendly interface.
